PRESS RELEASE

July 7, 2006

Glacial Lakes Energy, LLC in Watertown, SD announced today they have chosen the parcel of land in Edmunds County as the location of their new ethanol production facility. GLE also had an option on a parcel of land in Brown County; however the Edmunds County site was the more favorable due to rail, utilities, and other economic benefits. Safety is a top priority at GLE which is another reason for the selection of the Edmunds County site as the BNSF railroad tracks are on the south side of the property which eliminates trucks crossing the tracks to access the plant when delivering corn or picking up distillers grains.

Aberdeen Energy, a 100 mgy ethanol plant will be owned and operated by Glacial Lakes Energy, LLC an ethanol plant in Watertown, SD. Fagen, Inc of Granite Falls, MN has been contracted as the construction contractor and ICM, Inc of Colwich, KS will provide the process technology. GLE has utilized the Fagen, Inc/ICM team in the past to construct GLE in Watertown, SD, Granite Falls Energy, LLC in Granite Falls, MN and Redfield Energy, LLC in Redfield, SD which is currently under construction. Tom Branhan, CEO of GLE stated that he was been very pleased with the Fagen/ICM design build in the past and expects that Aberdeen Energy will meet those same high standards.

Dirt work is scheduled to begin this fall with Fagen, Inc mobilizing for construction early 2007. The plant is expected to be under construction for an estimated 14 months with start up in 2008.

Aberdeen Energy will provide an economic impact to the region and State by providing approximately 55 new jobs and consuming 35 million bushels of corn per year from the local producers as well as providing 320 thousand tons of distillers grains to the local feed market.

Aberdeen Energy will be one of four ethanol plants owned and operated by GLE and its investors. Glacial Lakes Energy also has ownership in Granite Falls Energy and Redfield Energy and serves as the managing partner of these two plants. GLE has proven to be environmentally conscientious and strives to be a good neighbor to the community. By doing so, GLE uses the latest technology available to ensure that any emissions that may come from the facility are minimal and non hazardous. As an example, GLE has been presented the Industrial Operation and Maintenance Excellence Award for two consecutive years in a row by the State of South Dakota. This award is for outstanding wastewater system operation and environmental compliance with its state surface water discharge permit for the past years. GLE is also known as a leader in the industry for their proven safety with over 1,350 days of no lost time accidents.

GLE will conduct an equity drive(s) to finance the construction of this facility within the next couple of months and intends to provide those living in the local region an opportunity to invest. If you are interested in investing in Glacial Lakes Energy for the construction of the Aberdeen production facility or want to learn more about the company(s) please contact their office at 605-882-8480 or visit their website at www.glaciallakesenergy.com.
