

What is a flex-fuel vehicle?

Flex-fuel vehicles, commonly called FFVs, are cars engineered to run on any ethanol/gasoline blend between E10 and E85. FFVs allow the drivers,

when available, to choose their fuel blend such as E20, E30, E50 up to E85. Drivers choose higher blends for a

number of different reasons: price, cleaner burning fuel, and to support American jobs and American-made products.

What are the advantages of FFVs & ethanol blends?

- Ethanol can help lower the price of a gallon of gasoline.
- Ethanol increases horsepower and octane.
- Ethanol reduces engine knocking and ping.
- Ethanol helps keep your engine clean by reducing fuel injection system build up.
- Ethanol helps prevent gas line freeze in the winter.
- Ethanol burns cleaner, reducing greenhouse gas emissions by as much as 50%.
- American Ethanol supports over 400,000 jobs across the economy, jobs that cannot be outsourced.
- American Ethanol increases our country's energy independence and strengthens our economic and national security by keeping American dollars at home rather than sending them to oil-rich countries in the Middle East and elsewhere around the globe.

Visit www.ChooseEthanol.com for more information and sources.

Are there a lot of FFVs on the roads today?

There are more than nine million FFVs on the roads today: including compacts, sedans, minivans, trucks and SUVs. American automakers have pledged to make 50% of all new vehicles model year 2012 and beyond flex-fuel capable.

Before you fill your tank with a flex-fuel blend, make sure you have a FFV. Check your fuel door, look for an exterior FFV badge, yellow gas cap, or look in your owner's manual.

Where can you find flex-fuel?

There are more than 2,800 retail stations offering these ethanol blends across the country. There's probably one closer than you realize. Visit our website to find the station nearest you. You can use your Garmin or TomTom GPS system, iPhone, iPad, Blackberry, or Android smartphone.

Head to www.ChooseEthanol.com for more information and step-by-step instructions!

If you don't own a FFV, you should consider one when you purchase your next vehicle. However, you can still use ethanol. You can use E10 in all vehicles and E15 in all vehicles manufactured after 2000.

Mercury Mariner	G		3.0L	3.0L												
Mercury Milan	G		3.0L	3.0L												
Mercury Sable	2														3.0L	3.0L

*Many 1995-98 Taurus 3.0L sedans are also FFVs. To verify FFV capability, check the owner's manual for a particular Ford/Lincoln/Mercury vehicle and look for badging and/or labels on the vehicle, on the fuel cap and/or near the fuel inlet to indicate FFV/E85.

MERCEDES BENZ

	2012	2011-2008	2007	2006	2005-2004	2003
C230			2.5L			
C240					2.6L	
C300	3.0L	3.0L				
C320					3.2L	3.2L
C350	3.5L					
E350	3.5L					
ML350	3.5L					

To verify if the Mercedes is a FFV: The fuel filler cap should be black with a yellow outer ring and there should be a label on the inside of the fuel filler door indicating "premium gasoline/min 91 Octane or E85 only". On the Vehicle Emission Control Information label, located under the hood, the fuel type should be "Gasoline/Ethanol" and indicate "FFV". Or obtain the Vehicle Identification Number (VIN) and contact the MBUSA Customer Assistance Center at 1-800-FOR-MERCEDES (1-800-367-6273).
